

SAJAN TAMANG

Richland Hills, TX | (254) 744-2969 | sajaanlaama@gmail.com
tamangsajan.com.np | github.com/cilantro011 | linkedin.com/in/sajan-tamang

EDUCATION

University of Texas at Arlington - B.S. Computer Science
GPA: 3.46

Expected May 2027

McLennan Community College - A.S. Computer Science

2023 – 2025

EXPERIENCE

Data Specialist | CloudFactory | Kathmandu, Nepal

Jan 2021 - Aug 2022

- Annotated and validated high-volume U.S. financial documents for AI training workflows, consistently meeting 99%+ quality targets.
- Followed client-specific labeling and confidentiality requirements and helped onboard remote team members on data-quality procedures.

PROJECTS

AI Door Greeter

2026

github.com/cilantro011/Klopchik-Face-Detector

- Built a Python door-greeter pipeline that recognizes known visitors from webcam frames using InsightFace embeddings and cosine similarity, then generates identity-aware greetings and responses.
- Integrated whisper.cpp, Gemini API, and Piper TTS for multi-turn spoken conversations with session history and local speech playback.
- Added automatic face enrollment, multi-person recognition, visitor-presence checks, and session reset logic when a visitor leaves.

Canvas AI Agent - Study Guide Generator

2026

github.com/cilantro011/canvas-ai-agent

- Built a Flask web app that connects to the UTA Canvas LMS REST API, retrieves enrolled courses and assignments, and filters upcoming work within a configurable 30-day window.
- Processed Canvas assignment descriptions with BeautifulSoup and integrated Gemini to generate contextual study recommendations from assignment content.
- Generated PDF study reports organized by course and assignment with ReportLab and served them through a Flask endpoint.

TECHNICAL SKILLS

Languages: Python, C++, C, SQL

Frameworks / Libraries: Flask, pandas, NumPy, scikit-learn, OpenCV, InsightFace, BeautifulSoup, ReportLab

Technologies / Platforms: HTML, CSS, MySQL, Docker, AWS, Git, Linux, REST APIs, LLM APIs
